***Allowance***

1. Authorization for this examiner's amendment was given in a telephone interview with Ronald Kananen on December 16, 2003.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

The new abstract now reads:

A method of and apparatus for determining a defect-free semiconductor integrated circuit, such as a CMOS IC. The method includes a measurement step of selecting a defect-free CMOS integrated circuit (IC) from a group of CMOS integrated circuits by measuring quiescent power supply current (QPSC), a step of successively inspecting a test IC and the reference defect-free IC for resemblance for QPSCs, and a comparison and determination step of determining resemblance between QPSC data so that when the resemblance is high, the first and second ICs are determined to be defect-free ICs, and when the resemblance is low, the first and second ICs are determined to be defective ICs. The apparatus performs at least those steps.

3. The following is an examiner's statement of reasons for allowance: The applicant's invention teaches determining a resemblance between the first and second

feature set of the quiescent power supply of the ICs to determine if the first and second ICs are free of defects. The prior art of record, however, does not teach comparing the feature data of the first and second ICs to each other, but instead teaches comparing the feature data of one IC to a defect free model.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Kim whose telephone number is 703-305-7468. The examiner can normally be reached on Monday-Thursday 10:00-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc Hoff can be reached on 703-308-1677. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
